

ELECTROPUTERE

Power Provider

68 years of experience

COMPANY PROFILE: ELECTROPUTERE is a renowned Romanian manufacturer of **Power Transformers** and **Rotating Electrical Machines**, founded on 1st of September 1949 in Craiova - Romania, which has since maintained its position among the world's leading manufacturers and delivered products to customers from over 50 countries.

PRODUCTS:

Power Transformers:

- Manufacturing range - between 10 - 440 MVA and up to 420 kV for a variety of applications, such as: generation, transmission, interconnection transformers, network transformers, etc.
- Production and engineering capabilities of 300 experienced employees, which can ensure a very good delivery term for partners and customers, in accordance with their needs

Rotating Electrical Machines (Motors and Generators):

- Customized for a wide type of applications such as: cement & metallurgical industry, oil & gas, water supply and irrigation, mining, energy production in thermal and hydro power plants, railway and urban vehicles, chemical and petrochemical industry, pulp and paper, testing equipment, etc.
- Manufacturing range - between 200 KW - 8,000 KW for low and medium voltage asynchronous motors and up to 5,000 KVA for synchronous generators and up to 1,500 KW for asynchronous generators
- Special flame proof motors, of increased safety, non sparking and pressurised in accordance and certified by ATEX

SERVICE: For its own products portfolio as well as for third party products, our company offers metallic constructions works, repairs, maintenance and after sales services.

CERTIFICATIONS: ELECTROPUTERE is certified by ISO 9001, ISO 14001, OH SA 18001, for the nuclear industry and by ATEX and its products comply with international standards such as IEC 60076 and ANSI C57.

BUSINESS MODEL: based on partnering with companies acting as EPCs, OEMs, agents and distributors to reach various markets and end-users and sustaining opportunities of developing mutually beneficial business relationships.
