

representing **BULDOCK**, a Bulgarian company specialized in **project planning, installation and maintenance of high quality floating dock systems, jet sliders and more**. *Today I'm contacting you because we're looking to establish strong bilateral relations with Hungarian companies and distributors that might be interested in our products and services.*

BULDOCK is a genuinely European company with our production plants, located in Italy. We can basically make everything float. Just have a look at the Mastaba in London ([Forbes](#)). It is a great example of what we're capable of. The Mastaba structure weighs around 600 tons that are built on top of our floating structure.

Another great project we have completed recently is the Floating Piers in Italy ([The New York Times](#)). It is one of the biggest floating structures in the world.

Being recognized by **world-renowned brands and artists** such as **Red Bull and Christo** gives us and our clients the confidence that we can tackle any challenge and fulfill any need.

We are looking for cooperation with **solar panel companies, wedding agencies, hotels, restaurants, event companies, equipment suppliers, marinas, construction and civil engineering companies, jet and boat builders as well as resellers** or any company which business is **connected to waterbodies**.

*Therefore, we'd love to explore the opportunities and how you may be able to help our business development in Hungary. In fact, we'd also like to kindly invite you to **Red Bull's Cliff Diving event** in Sisikon, Switzerland on the 5th of August where you can see our floating structure and enjoy the most famous Cliff Diving Championship in the world.*

In addition, please find our company brochure and presentation as attached files. It will greatly help you understand the scope of our services and the numerous applications our floating dock systems have
