

# Coho Farms - An Introduction 2017

*Private & Confidential*

# Our Mission

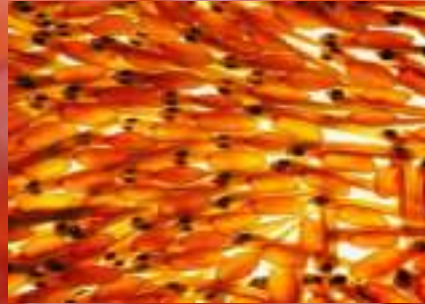

- Coho Farm Ltd is proud to introduce the European Union's latest sustainable, recirculation aquaculture Coho (Pacific, Silver) Salmon farm
- According to the Seafood Watch program of Monterey Bay Aquarium, Coho Salmon from Recirculation Aquaculture is rated "Best Choice"
- Through state of the art technology Cohofarm achieves constant filtration and control of the water, which combined with top quality, specialized and natural feed guarantees optimal living conditions for ecologically clean product, with no compromises to quality
- Our mission is to be the leading vertically integrated supplier of sustainable Coho salmon (*Oncorhynchus kisutch*) to our chosen markets, with supreme quality and incredible taste

# Production cycle

Early Rearing

- Eggs are purchased from certified “pathogen-free” 3<sup>rd</sup> supplier and introduced to the hatchery
- The hatchery produces 30-gram juvenile fish every 90 days
- Upon transfer to grow out tanks, fish reach the target weight of 3 kilograms within 16 months

Grow Out

- Production groups are staggered throughout the year for harvest capabilities of 200 MT's/annum
- Only top quality specialized, natural feed is used with no hormones, antibiotics or additives
- Fish are transported to certified 3<sup>rd</sup> party processor within hours of harvest to ensure the best quality product. Advance planning and permits are underway for own processing facility .
- The product is fully traceable with steady weekly harvests all year long.

Processing

# Our Products

Texture:	Moderate
Flavour:	Mild
Availibility:	Year long
Size and format:	Variable-fresh, never frozen
Packaging:	Custom order
Origin	Gorni Okol, Samokov Region Bulgaria

**NOTE: This product is from sustainable aquaculture rated "Best Choice" by Seafood Watch**
